Our
programme
for end users
& corporates

We accelerate your innovation

We help large organisations to accelerate their technological innovation process, connecting them with an ecosystem of startups and SMEs that are experts in advanced technologies and propose disruptive solutions.

**We are your
innovation ecosystem
with deep tech**

We offer you...

Know-how on innovation
with deep tech

Access to talent

Technology radar

Visibility and positioning

Involvement in macro
projects

We address...

Innovation Units

We support R&D, innovation, production or quality units in identifying technological innovation challenges and transforming them into innovation projects, boosting the company's level of competitiveness.

Corporate Venturing Units

We support corporate venturing units in identifying spinoffs and startups with high value propositions for the company, and we accompany them in the process of integrating these external innovations within the organisation, boosting the company's level of competitiveness.

Our formula. We connect you to the future.

A methodology endorsed by more than 500 companies in 30 industrial sectors.

Discover

- **Deep tech training.**

Practical training session on state-of-the-art and upcoming evolutions of the different deep technologies.

- **Challenge approach**

Accompanying large industrial companies in the definition, by iterations, of technical requirements for a specific technological challenge.

Explore

- **Deep tech scouting**

Identification of the best technologies and partners to solve a specific research or innovation challenge.

- **5 Star Pitches**

Sessions designed to connect with the most innovative emerging technology startups of the moment. The aim is to generate relationships and collaborative innovation that boost both the competitiveness of large companies and the viability of the startup.

Generate

- **Innovation Workshops**

Technical innovation sessions moderated by specialists, applying our own highly effective methodology. They are aimed at deepening the technical knowledge of the challenges and discussing the different options for tackling them.

- **Pre-projects working groups**

We apply effective facilitation methodologies to create a collaborative project in a very short time and connect it to sources of R&D&I funding.

You will be part of our....

Open Innovation Club.

Aimed at executives of the large companies that lead the rankings of investment in R&D&I, the objective of our OIC is to promote collaborative innovation between these large companies and the leading experts in deep tech.

Already leading the future...

Seeking pioneers. Are you in?

Pricing plan

according to annual revenue in the last closed financial year*
