

Smart agrifood industry

25-26.05.21 VIRTUAL FAIR

EXHIBITORSPARTICIPATION OPTIONS

smart agrifood industry

At the Smart Agrifood Industry
Virtual Fair you will have the
opportunity to showcase the latest
innovations in technologies for the
agrifood industry that can be applied
throughout the entire value chain, as
well as to catch up on trends and get
to know better customers, competitors,
suppliers, distributors, etc.

The agrifood industry must address major challenges that include environmental impact and biodiversity loss, food optimisation, as well as food quality and security - all in all challenges for which deep tech is a great ally.

The virtual environment of this Smart Agrifood Industry expo allows you to generate leads with all those contacts who pass by your stand, chat behind a counter or sitting at your meeting table, collect and hand out business cards, show videos and all kinds of information about your products, and of course, attend and give talks in the congress area or participate in the B2B matchmaking zone. This Smart Agrifood Industry is like a face-to-face trade fair, but with the superior performance offered by the automatic digitisation of contacts.

01

Exhibition Area

As much exhibition area as you can imagine to host the innovative technologies applied to the agrifood industry.

02

B2B Area

Participants will be able to automatically schedule meetings with each other and will have voice chatrooms in the format of tables available for conversations.

03

Meeting Room

Virtual rooms with different capacities to attend your private meetings.

04

Auditorium

The virtual auditorium with capacity for 1000 people will host the Smart Agrifood Industry Congress.
