Expert advice

The time is now

Deep tech is a global phenomenon.
Private investment in these technologies has skyrocketed.
Deep tech will transform our businesses and society in future.
Are you thinking about developing a deep tech strategy? The time is now.

▲ **20%**
per year

Global private investment in deep tech has been growing by 20% every year since 2015.

40 M€

More than 30 companies from our ecosystem are currently seeking €40 million in funding.

18 success stories

Of startups that received private investments over the last 5 years in our deep tech ecosystem.

Investing in deep tech is easier than you think.

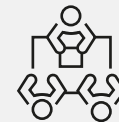

At secpho we know how to do it, since we are dedicated to accelerating technological innovation through deep tech, connecting research and entrepreneurial talent with capital, market and the challenges of our society.

Visibility and positioning

- Positioning at exclusive events within our Open Innovation Club where you may connect with the industry and emerging startups.
- Positioning within an international community of investors specialised in deep tech where we promote networking and co-investment.
- An investors community based on trust and collaboration.

Training and advice

- Access to continuous training sessions based on case studies on state-of-the-art deep tech and real investment cases.
- Constant contact with our ecosystem and expert forum.
- Expert scientific and technological advice on known cases so that you can secure your deep tech investments.

Deep tech radar

- Access to a portfolio of more than 30 startups and R&D centres that are currently seeking private investment for different initiatives.
- Continuous connection with new startups and emerging spin-offs from the main R&D centres in our ecosystem.
- Regular organisation of pitching sessions for new startups that have been identified.

are able to achieve what noone else has done before.**

What do you want to achieve?

Already leading the future...

A cluster gathering more than 150 organisations that foster innovation through deep tech.

Some investment professionals are already swimming in new waters.

Explore our investment forum

Your virtual environment in secpholand

Explore our new hybrid tool, combining professional network and virtual platform. You will be able to stand out in the deep tech ecosystem and have your own virtual office or event room located in the investment forum, personalised with your brand identity, to carry our private virtual meetings or your own events in a 3D environment. Moreover, you can publish your brand's podcast in the hall of the investment forum and listen to other inspiring podcasts from the deep tech field.

Interested to join any of our training sessions?

You may sign up for our investors training sessions separately focusing on specific deep technologies or directly join our full training programme for investors to benefit from the 5 sessions covering all deep technologies.
